Yes, that's the NRC report. Since I'm on call for the rest of the week, is there someone I should notify when I get NRC reports?

Hi there; re NRC report of sheen in water; is it NRC 1123491 from 1800 Block of Fernald Point Rd heading toward Summerland? If this is the report you are referring to, since this went to NRC/OES our on call staff got it and should have followed up; i'll check with them, thank you

Subject: Re: Phase 3 maintenance and monitoring plan; SB any final comments today 11:00

Thanks for the update and welcome back.

Also, is there a number for people to call to report oil/tarballs? I got a call from NRC last night of a citizen's report of oil in Santa Barbara so is like to pass that along to someone.

Thanks.

Good morning folks;

I have taken over as Refugio EUL till next Monday. FYI, I emailed Robert Troy, SB County, this am (below) to see if they have any final questions/comments on Phase III maintenance and monitoring plan and per his reply below he said he would get back to me by 11:00 today.

Hello Robert;

I am back at Refugio as EUL...per Mike Connell who I relieved he said the Phase 3 maintenance and monitoring plan has been approved by all except SB County and he said you were asking for the list/names of folks that provided comments and this is attached. This Phase 3 plan was sent to the following people in the attached Word doc and also includes Jonathan Bishop w/ Ca Coastal Commission (not on Word doc because Word doc has list of folks that reviewed/commented on cleanup endpoints phase 1 and phase 2 and now phase III). Can you please send us final round of SB County comments (since you

already sent comments) ASAP so this can be finalized?

Thanks in advance.

Subject: Friday Meeting with the County

Good Morning Everyone:

I just wanted to send a quick note regarding my meeting last Friday with the County. Rom Mathews was there with USCG. We had Supervisor Chair Wolf, Supervisor Farr, their chiefs of staff, Diane Black from Planning and Development and Renee Bahl, Assistant Co. CEO. I have been assigned the OSPR liaison responsibility with the BOS Chair Wolf and

Renee Bahl as Chuck Bonham agreed to at the hearing, and continue to work with the Unified Commanders as this process unfolds, so we are all on the same page and speaking with one voice. All in all, the meeting went well. And there were a few of things the County was hoping to get from us (OSPR/UC). I will do a trip report sometime today for both the EUL and the UC, but I wanted to get a couple of things out. I was too tired over the weekend. I know you can relate.

1. Clean Up Endpoints document from Cosco Busan. Randy Imai provided me with this and I sent it to a small group of you to make sure that it is appropriate for distribution.
2. There are specific beaches/segments which have been “signed off as clean” that they still have concerns over and they would like to have copies of the STRs and the “sign off documents” so they can understand what the SCAT team was looking at and any specific constraints. I asked them to provide us with the specific beaches and we would see what we can do. I spoke with Mike Connell regarding Driftwood Beach (one of their primary concerns) and he said he thought that there were some “safety constraints” associated with that beach. Anyway, I wanted to give everyone a “head’s up.” I will provide the list of beaches/segments when I receive this.
3. They continued to be concerned with transparency and we spent a great deal of time discussing “concepts” for Phase 3 and what they could expect for how the sampling results would be shared with the public. I forwarded the press release on the sampling blitz on Saturday morning. They wanted to get the most recent copies of the draft of Phase 3 with the current comments. I told them they could get this from their LGOSC.
4. The two supervisors wanted assurances that OSPR/DFW would be on-going partners with them as the cleanup ends and the long-term monitoring restoration begins. I assured them that we would be there and confirmed with Julie Yamamoto that they would have a seat next to us during the NRDA process (a specific request and how it was done during Torch).

Well, I think that is the long and the short of it. Again, I will get something out to the UC later today. Thanks everyone. Yvonne.
